The Earth As Art: Views From Heaven

Synopsis

The beauty of our planet. --Photographs from all the continents. --A photographer's fascinating life oeuvre. --Poetic, artistic pictures that meet the highest photographic standards. An extraordinary treat! Klaus-Dieter Francke's photographs present an ethereal geography of our planet, depictions that could be mistaken for masterful drawings. He introduces us to a primeval, almost uninhabited place where knotted roots, meandering rivers, glaciers and dunes define the passage of time. In a few cases, humans and animals are seen traversing its broad expanses. Views of the Earth as you've never seen it before!

Customer Reviews

The book is wonderful. But it came damaged. One corner was bent. There were indentation marks on the cover. I was gone most of Christmas/New Years so didn't have time to lodge a complaint immediately on receipt of the package. I think the people working in the shipping department ought to inspect products for damages before sending them. WILL SEND ME A NEW BOX TO RETURN THE BOOK AND SEND ME ANOTHER IN NEW CONDITION WITHOUT CHARGING ME?GEORGE OLLEN

I have bought many excellent books dealing with aerial photography by photographers Adriel Heisey (several excellent books), Hass, Dech, and Arthus-Bertrand's series of Earth From Above, but Francke's book is magnificent. This is a large book and I have decided to order two extra

copies. For some reason Adiel Heisey's books are difficult to find when searching for "aerial photography" on . Howard McPherson, Moab, Utah
